

# Biochar Lawn Improver

Promotes root development, and reduces nutrient leaching so an ideal medium whether you are planning to give your existing lawn a much-needed boost, or alternatively as a base layer when re-seeding or laying new turf

This product is used by sports turf professionals, on golf and bowling greens, polo pitches, racecourses, and Premier League sports pitches, because it helps grass root quickly.

Creating a resilient soil profile through adding in the soil food web.

## How to use

**Lawn repair:** 45g/litre of a light sand/soil mix with seed to revive those brown patches in your lawn you can use it as a surface dressing; simply fork the ground well and sweep the product into the holes.

**Re-seeding:** 1 kg/m<sup>2</sup> it can also be used as a base layer for new turf or when seeding. Distribute the product on the soil and rake in before seeding.

**Laying turf:** Sprinkle 1 kg (2L)/m<sup>2</sup> on the prepared soil before laying your new turf.
