

# Biochar Tree Fertiliser

A pelleted form of our tree product combined with potassium phosphite. This combination of natural ingredients provides plants with the necessary nutrients and supplements they need to grow and remain healthy.

The biochar pellets improve soil structure and help retain nutrients, which supports the growth and development of your woody plants and trees.

## How to use

Our Tree Fertiliser pellets can be used as a stand-alone product or can be used in combination with our Tree Soil Improver.

**When using on its own:** Use 0.75kg/m<sup>2</sup> of the tree canopy.

**To mix with our Tree Soil Improver:** Use a ratio of 2 parts Tree Soil Improver to 1 part Tree Fertiliser.
